Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4-7,9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Quigley (5324248). Quigley discloses a double skin tubular construction (figures 2-3 comprising;

1. a fiber reinforced polymer outer tube 36/34; the fibre reinforced polymer includes a majority of fibers oriented circumferentially around the tube
2. the fibre reinforced tube is constructed from a plurality of layers of fibre reinforced polymer
3. an inner tube 48 made from a steel material
4. a filler mater 34/44b provided between the outer tube 36 and the inner tube 48
5. the providing and inserting steps have obviously been performed by Quigley as they are shown
6. the fibber reinforced polymer acts as a construction form during a curing stage of the filler as much as applicants polymer performs with the same limitations; there are no real or positively recited method steps in claim 9.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-3, 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Quigley.

The material for the filler and the method in which the fibre reinforce polymer has been made has been considered a matter of choice. One of ordinary skill in the art would have appreciated all of the known types of fillers and would have selected any one capable of filling the intended use, function and purpose of the invention. Moreover, the claims are not directed to a method but article the fibre reinforced polymer layers are shown by Quigley. One of ordinary skill in the art would have appreciated all the methods to construct them and would have selected any one method commensurate with the intended use and financial budget.
